

# PRIYANSHU KUMAR

Full Stack Engineer • Java / Spring Boot • React / Next.js • AI Integrations

Noida, India • [priyanshu.dev.agile@gmail.com](mailto:priyanshu.dev.agile@gmail.com) • +91 60069 35523 • [linkedin.com/in/priyanshukumar1265](https://linkedin.com/in/priyanshukumar1265) • [github.com/PriYanahsu](https://github.com/PriYanahsu)

## Summary

Full stack engineer with ~1.5 years of experience building production web and mobile applications with React/Next.js, TypeScript, and Java Spring Boot. Experienced in building end-to-end features across frontend, REST APIs, PostgreSQL, and AI/LLM integrations.

## Skills

- **Languages:** Java 21, TypeScript, JavaScript, Python, SQL
- **Backend:** Spring Boot 3, Spring Security, JPA/Hibernate, REST, OpenAPI, FastAPI, JWT, RBAC
- **Frontend:** React, Next.js (App Router), Tailwind CSS, TanStack Query, Zustand
- **Data:** PostgreSQL, Flyway, MySQL, Redis, Supabase
- **Testing & DevOps:** JUnit 5, Mockito, Jest, Playwright, Docker, GitHub Actions, AWS (EC2, RDS), Vercel, Render
- **AI:** Gemini & OpenAI APIs, structured outputs, prompt-injection guarding, RAG, pgvector, Claude Code, Cursor

## Experience

Associate Software Engineer | Cognivac

May 2025 – Present

- **Docqfy (Property Audit Platform):** Built a multi-tenant audit and management platform (Next.js, FastAPI, PostgreSQL) with 3 role-based portals (Admin, PM Company, Tenant) covering 20+ screens for properties, leases, tenants, and audits.
- Designed 40+ FastAPI REST APIs (auth, properties, leases, tenants, audits) with JWT authentication and row-level ownership checks, so each role can only access records it owns.
- Modeled properties, units, leases, tenants, and audit records in a normalized PostgreSQL schema of 15+ tables.
- **Clinic Appointment System (client product):** Built the Spring Boot backend and Next.js frontend for doctor slot scheduling, patient self-booking with conflict checks, and automated reminders via 3 channels with instant confirmations.
- Built an admin analytics dashboard with per-doctor and per-clinic booking trends and peak-hour no-show patterns.
- **Upwork Job Tracker (Browser Extension):** Built a JavaScript browser extension with a FastAPI backend that auto-captures Upwork job details on proposal submission and tracks each application through 5 statuses on one dashboard.
- **Reddit Devvit Games:** Built and shipped 4 word games on Reddit's Devvit platform (Wordabble, Looonguess, WordClash, Word Search) with 50+ levels as subreddit posts, a player level creator via the Reddit API, and Redis for level data and user progress.

## Projects

FoodCal – AI Nutrition & Fitness Coach | [Frontend](#) | [Backend](#) | [Live](#)

Jan 2026 – Present

Next.js, TypeScript, Tailwind CSS, Spring Boot, PostgreSQL, Flyway, JWT, Gemini API, Supabase, Docker, Render, Vercel

- **Photo-to-log pipeline:** Gemini returns a per-ingredient breakdown under a strict JSON response schema; the API re-sums components, verifies the 4/4/9 kcal-per-gram macro identity, and rejects low-confidence reads instead of logging a guess.
- **Deterministic plan engine:** BMR and TDEE via Mifflin-St Jeor, weekly change capped at safe rates, and calorie floors enforced in code; the LLM only explains targets and cannot set them.
- **API & data layer:** JWT access and refresh tokens, per-route ownership checks that block cross-account reads, 14 Flyway migrations on PostgreSQL, and Supabase storage for meal photos and avatars.
- **Production hardening:** ranks available models newest-first and fails over on quota, deprecation, and overload errors; treats user-written meal notes strictly as data to block prompt injection.

HireCheck – Online Examination & Assessment Platform | [Frontend](#) | [Backend](#) | [Live](#)

Dec 2025 – Present

Next.js, TypeScript, Tailwind CSS, Spring Boot, PostgreSQL, JWT, Docker

- **Exam workflow:** Built the complete assessment flow for admins to create papers, configure questions, generate student exam links, and manage exam attempts through Next.js and Spring Boot.
- **Automated evaluation:** Implemented backend-driven submission and evaluation logic that processes student answers, calculates results automatically, and persists structured attempt data in PostgreSQL.
- **Exam analytics:** Developed admin analytics for tracking student attempts, scores, and performance, transforming submitted examination data into structured assessment insights.
- **Assessment security:** Implemented JWT authentication and role-based authorization across frontend and backend, protecting student exams and administrative operations from unauthorized access.

## Education

Master of Computer Applications (Data Science) | Babu Banarasi Das University, Lucknow

2023 – 2025

Bachelor of Computer Applications | Shri Ramswaroop Memorial University, Lucknow

2020 – 2023

## Achievements

- **1st place**, CODE RUSH 2.0, 2024 university hackathon; **450+** DSA problems solved on LeetCode and HackerRank; **5-star** HackerRank ratings in Java and SQL.
