Experience

Software Developer | Cognivac

May 2025 – Present

- Designed and developed scalable full-stack web and mobile applications using Next.js, React.js, and React Native, ensuring responsive UI and optimized performance.
- Engineered backend services using Spring Boot, FastAPI, and Java, building secure, scalable RESTful APIs with proper authentication and authorization mechanisms.
- Implemented end-to-end features across the application stack, including API design, state management, and database integration.
- Integrated third-party APIs, including Reddit APIs and built applications using Devvit (Reddit Developer Platform) for automation and platform-specific feature enhancements.
- Optimized application performance by improving API response times, reducing load latency, and implementing efficient data handling strategies.
- Applied best practices such as MVC architecture, clean code principles, and modular design for maintainability and scalability.
- Worked with relational databases (SQL) and handled data modeling, query optimization, and schema design.
- Collaborated in Agile/Scrum environments, participating in sprint planning, code reviews, and CI/CD workflows.
- Used Git for version control and followed continuous integration and deployment practices for reliable releases.

Projects

FoodCal – AI-Powered Nutrition & Fitness Tracker | [GitHub](#) | [Live](#)

Dec 2025

Next.js, Tailwind CSS, Python, Supabase, OpenCV, Google Gemini, OpenAI, PWA

- Developed an AI-powered nutrition and fitness platform that analyzes food images to estimate calories and macronutrients in real time.
- Integrated Google Gemini, OpenAI APIs, OpenCV for image processing, food recognition, intelligent data extraction.
- Designed and implemented step tracking algorithms with anti-cheat validation, real-time monitoring, goal notifications.
- Implemented backend services and real-time data synchronization using Supabase, including authentication and database management.
- Engineered a user-centric health dashboard for tracking daily intake, activity insights, personalized fitness metrics.

Gym Management System | [GitHub](#) | [Live](#)

Aug 2025

ReactJS, TypeScript, Tailwind CSS, Supabase, PostgreSQL

- Built a complete gym management system to track memberships, payments, and product sales effectively.
- Implemented automated membership status checks and product payment alerts to improve owner efficiency.
- Designed an intuitive, real-time dashboard with **ReactJS**, **TypeScript**, **Tailwind CSS** for easy tracking.
- Used **Supabase**, **PostgreSQL** for backend database management and real-time updates.

Education

Babu Banarasi Das University, Lucknow, Uttar Pradesh

August 2023 - July 2025

Master of Computer Application (Data Science)

Shri Ramswaroop Memorial University, Lucknow, Uttar Pradesh

August 2020 - July 2023

Bachelor of Computer Application

Skills

- Frontend:** HTML, CSS, Tailwind, JavaScript, ReactJS, Next.js. React Native
- Backend:** Spring Boot, RESTful APIs, FastAPI,
- Programming:** Java, Python
- Databases:** MySQL, PostgreSQL, MongoDB, Supabase, Firebase
- Tools & Platforms:** Git, GitHub, Docker, Devvit, VS Code, Zira, Clickup, Slack, Jupyter Notebook

Personal Attributes

- Hackathon Winner:** Secured **1st place** in a university-level hackathon, showcasing teamwork, real-time coding, and problem-solving under pressure.
- Problem-Solving:** Solved over **450+ coding questions** on platforms such as LeetCode, secured top **10%** ranking.
- Competitive Programming:** Achieved **5-star ratings** in Java and MySQL on HackerRank, validating expertise in coding and databases.
